

Clarification on Providing Recommendations for Near Term Actions
[Handed out to Strategy Teams from Subcommittee at Rochester Meeting]

By October 14th, provide Macara written recommendations for near term actions, along with details including:

- what the specific action is
- lead entity(ies)
- other partners that need to be involved
- estimated cost
- milestones/completion dates

The near term recommendations will be used to advise the Executive Committee as it develops the final Action Plan. In some cases, these near term recommendations are sufficiently described in the chapters already.

The Strategy Team co-chairs should also provide their revised chapters, based on the public comments, to Macara by October 14th. The original five-page, five recommendation limit still applies.

If you have any questions, please see Macara.
