

Appendix B

Draft Final Organizing Concepts.V3

- I. Problem Statement
 - a. Current Ecosystem Impacts/Potential Threats
 - i. Priority Pollutants
 - 1. In Use
 - 2. Banned Pesticides
 - ii. Emerging Chemicals of Concern
 - b. Sources and Pathways
 - c. Short and Long Term Implications of Status Quo
- II. Desired Goals
 - a. Ecosystem Health
 - i. Human Health (e.g., eliminating current fish advisories)
 - ii. Ecological Health (e.g., meeting GLI standards)
 - b. Preventing Future Chemical Threats (i.e., new PBTs entering GL basin)
- III. Identify Ongoing Efforts
 - a. Preventing and Reducing Releases of PBTs
 - i. Regulatory Programs
 - ii. Pollution Prevention/Voluntary Programs
 - 1. Healthy Hospitals
 - 2. Mercury Auto Switch Removal
 - 3. Design for the Environment
 - 4. Cleansweep Programs
 - 5. Environmental Management Systems
 - 6. Environmentally Preferred Purchasing
 - iii. Existing Great Lakes PBT Programs
 - 1. GLBTS
 - 2. LaMPs
 - 3. RAPs
 - b. Cleanup and Remediation
 - c. Education and Outreach
 - d. Assessment
 - i. Chemical Screening Programs
 - ii. Toxicology Research (Human Health and Ecological)
 - iii. Monitoring and Surveillance
 - iv. Modeling, Forecasting and Risk Assessment
 - v. Indicators
- IV. Evaluate Alternative Approaches
 - a. Analysis of Pros and Cons of Status Quo (ongoing efforts above)
 - i. Deficiencies
 - ii. Needs
 - b. New Possibilities
 - i. Costs and Feasibility
 - ii. Benefits

- V. Recommended Actions
 - a. Summary of Actions
 - b. Costs, Schedule and Anticipated Benefits
 - c. Roles and Responsibilities
 - d. Monitoring and Reporting Progress and Projected Endpoints

Overarching Themes/Cross Cutting Issues for all Strategy Teams

Tribal interests and perspectives

Human Health impacts and priorities
